## MINI LOCKING: UNLOCKING COMFORT

Kiekert mini locking systems promote movement and comfort in vehicle interiors. These quiet but strong devices make life easier by electronically locking and unlocking glove compartments, headrests, center consoles, seatbacks, fuel tank caps and trunk lids. The housing offers great flexibility in design and easy adaptation to any plug technology. Offered in mono- and bi-directional versions, Kiekert mini locking systems are a flexible solution for the increasing demand for comfort features in modern vehicles.

### **BENEFITS AT A GLANCE**

- › Handling of high forces
- › High flexibility through easy adaptation of force, actuation time and travel
- › Large product variety
- › Thoroughly tested, robust and durable
- › Long actuation travel

### **EVERYDAY ADVANTAGES**

- › Increased comfort through wide interior application range
- › Safe storage of items in glove compartment or center console
