TRUNK LATCH: THE FLEXIBLE AND SAFE SOLUTION

The fully modular design of the Kiekert trunk latch enables a large number of varieties to cover all market needs, specific to each region. The flexible design of the installation dimensions and variable interfaces meet individual customer requests "as standard".

Additional options such as pushbutton release, integrated electrical/mechanical closing, or a fluorescent interior release system for opening the rear compartment in an emergency, further enhance comfort and safety.

BENEFITS AT A GLANCE

- › Modular and variable, for many vehicle models
- › Various functions in a single product
- › Flexible installation positions
- › Interface for closing aid (Bowden cable)
- › Small, light and safe

EVERYDAY ADVANTAGES

- › Emergency opening: Manual release from the inside of the vehicle
- › "Snow load function": Liftgate remains open even when depressed by snow and wind
- › Reliable and durable
