# actiMOVE: MORE MOTION, MORE COMFORT

The Kiekert actiMOVE system enables automatic as well as manual door operation. The variable and fully adaptive system offers a multitude of functions, which can be controlled via software. The servo mode enables “weightless” door operation. In case of a power loss, doors can be opened effortlessly thanks to the deactivated clutch system.

## BENEFITS AT A GLANCE

- › Silent door closing through dynamic brake system
- › High precision through Magnetorheological-Technology
- › Modular concept
- › Customizable via app or vehicle specific infotainment system

## EVERYDAY ADVANTAGE

- › Fully automated door opening and closing
- › Open door holds in any position
- › No swing back effect even when car is parked on an incline
