CONNECT

## actiSLIDE: CONVENIENCE BY DESIGN

Kiekert's actiSLIDE is the ideal solution for easy access. With its very quiet electric drive and compact dimensions it offers easy integration. The modular design permits individual assembly of components in the respective vehicle's available installation space.

The possibility to use the same drive on both sides of the vehicle eliminates the usual costs of tooling for adaptation.

### **BENEFITS AT A GLANCE**

- › Low weight
- › Compact yet powerful drive
- › Modular – drive, gearing, controller etc. can be placed individually
- › Tested – each drive is individually checked for volume / acoustics during the production process

### **EVERYDAY ADVANTAGES**

- › Acoustics – very quiet opening and closing operation
- › Convenience – easy loading and unloading
- › Comfort – opening and closing by the touch of a button
