conTRONIC: CONTROL IS EVERYTHING

The Kiekert conTRONIC makes your vehicle access product smart. It reliably defines what your product is supposed to do when and how. Kiekert, as a system supplier, provides the electronic control unit for different types of access solutions.

The Kiekert conTRONIC can be backed up by batteries or supercaps to assure 100 percent functionality even in case of a power failure due to a crash. Due to the modular design, the conTRONIC can be adapted for an ultra-low power performance for special variants.

BENEFITS AT A GLANCE

- › Modular design
- › Adaptive & customizable
- › One solution for different products – even as an entire door ECU
- › Everything from one source – Kiekert is your reliable vehicle access system supplier

EVERYDAY ADVANTAGES

- › Supercap alternative with batteries possible
- › Safety in any crash situation due to a power backup
- › Electronic competence as one of Kiekerts core competencies
