TECHNOLOGY THAT LEADS

presENTER: OPENING DOORS

The easy access solution.

PROTECT

MOVE

CONNECT

presENTER: PUSHING AHEAD

The Kiekert presENTER is an easy access solution for vehicles with modern door designs. The compact device automatically opens the door slightly after it has been electrically released. An extending pin brings the door towards the user, holds it in position and is also able to pull the door shut. The additional icebreaker function permits secure opening of frozen doors. The powerful drive pushes the door open from the inside for comfortable and effortless access in any weather condition.

BENEFITS AT A GLANCE

- › New / Alternative door design possibilities
- › Durable and powerful
- › Compact dimensions

EVERYDAY ADVANTAGES

- › Added convenience
- › Effortless door opening
