TECHNOLOGY THAT LEADS

reactiWAKE: ACCESS RELOADED

Digitally connected backup solution.

reactiWAKE: ACCESS GRANTED

The Kiekert reactiWAKE redefines design freedom.

The elimination of the lock cylinder and the key bit opens up new possibilities in door and handle design. Access to the vehicle can be by smartphone with a dedicated app, key fob, RFID, Bluetooth or NFC.

In case of a total failure of the vehicle battery, the latch can be locked and unlocked, using externally accessible contacts or an integrated energy source.

BENEFITS AT A GLANCE

- › Increased design freedom
- › Easier and more efficient handling through digital keys
- › Higher resistance to break-in through deletion of mechanical components
- › Reduction of components
- › Autonomous system
- › Large variety of ID transmitter options

EVERYDAY ADVANTAGES

- › Easy access in case of electrical failure
- › Simple user guidance with smartphone/app version
- › New vehicle design options
