secuCHARGE: EFFICIENCY AND PERFORMANCE.

The Kiekert secuCHARGE is the perfect solution for all electric vehicles, in all classes. With its evoloid gear it delivers maximum performance in minimal space.

The drive is lighter and tougher than anything else on the market. Even in case of a power failure durable functioning is ensured by a mechanical redundancy, while still providing dependable theft protection for the charging cable.

It can be operated by the vehicle keyfob or by a signal from the charging station.

BENEFITS AT A GLANCE

- › Optimal operating speed
- › Compact design, fitting in very small spaces (the size of two stacked matchboxes)
- › Precise contactless sensing of the locking element position

EVERYDAY ADVANTAGES

- › Highly reliable even in adverse weather conditions
- › Much quieter than most actuators
